Yen, Grace S.L., 15

Subject Index to Volume 22

α-amylase, 47
Acid hydrolases, 69
Allophycocyanin complexes, 1
Amphiphilic, 209
Asialoglycoprotein receptor, 55

Bacterial reaction centers, 251
Bacteriochlorophyll, 251
Bacteriopheophytin, 251
β-hexosaminidase B, 69
Biliproteins, 1
Black lipid membrane (BLM), 55
β-lactamase, 141
Breast tumor cell line, 111
Brush border, 47

Cancerous cells, 131
Cell culture, 121
  cycle, 15
Charge clusters, 55
Chemotherapy, 187
Chloroflexus aurantiacus, 251
ct TAC, 31
ct tRNA genes, 31
Cyanobacteria, 1
Cytoskeletons, 99

Differentiation, 245
Dipole potential, 55
DMF, 245
Dog pancreatic microsomes, 151

EGF receptors, 99
Egg envelopes, 235
Endocytosis, 131
Energy transfer, 1
Envelope, 209
Escherichia coli, 87
Euglena gracilis, 31
Expression, 87

Fertilization, 235
Fibroblast secretions, 69
First-trimester, 47
Freeze fracture, 15

Gene cloning, 87
Globomycin, 161
Glycoconjugates, 131
Glycogen, 47
Glycopeptides, 69
Glycoprotein, 209, 235

Hemolysin, 87
Heterologous gene expression, 141

Immunoprecipitation, 197

Lectins, 99
Leishmania, 173, 187
Lysosomotropic amines, 69

Macromolecule distribution, 15
Maltooligosaccharides, 47
Mammary gland, 121
Maternal-fetal interface, 47
Maturation, 245
Melittin, 55
Membrane, 47, 209
  lectins, 131
  potential, 55
Menaquinone, 251
Metabolism, 187
Microvilli, 47
Mitoxantrone, 111
Molecular topography, 235
Myeloperoxidase, 173

Neoglycoproteins, 131
Nerve growth factor, 219

NGF receptor, 219
  binding, 219
Nuclear proteins, 245
Nucleic acid synthesis, 111

PC12 cells, 99, 219
Peroxidase, 173
Phagocytes, 173
Phospholipid vesicles, 55
Phosphomannosyl receptor, 69
Photosynthetic membrane synthesis, 15
Phycobilisome substructure, 1
Pinocytosis, 69
Polar solvents, 245
Placenta, 47
Prepenicillinase, 161
Preprotein, 141
Primary photochemistry, 251
Processing, 31
Prolactin, 121
Prolipoprotein, 161
Protein secretion, 161
Protozoa, 173
Purine, 187
Pyrazolpyrimidine, 187

Rabbit, 121
Reaction centers, 251
Receptors, 121
  clustering, 99
Respiratory burst, 173
Rhodopseudomonas sphaeroides, 15
RNA polymerases, 31
Rotavirus glycoproteins, 151

Saccharomyces cerevisiae, 141
Signal peptidase, 161
  sequences, 151
Specific processing, 141
Structural proteins, 197
Surface charge, 55
SV 40, 197

Thymidine, 111
Toxoplasma gondii, 173
Transcription, 31
Transport, 87
Triton X-100, 99
Trypanosoma cruzi, 173
Trypanosome, 187
Tryptic peptide analysis, 197

Ubiquinone, 251
Uridine, 111

Virus, 209

Contents

Volume 22, Number 1 **1983**

ARTICLES

Core Substructure in Cyanobacterial Phycobilisomes, **Jeffrey C. Gingrich, Daniel J. Lundell, and Alexander N. Glazer** 1

Selective In Vitro Transcription of Chloroplast Genes, **Wilhelm Gruissem, Jonathan O. Narita, Bruce M. Greenberg, David M. Prescott, and Richard B. Hallick** 31

High α-Amylase Activity in the Syncytiotrophoblastic Cells of First-Trimester Human Placentas, **Susan J. Fisher and Roger A. Laine** 47

INVITED REVIEWS

Biosynthesis of the Photosynthetic Membranes of Rhodopseudomonas sphaeroides, **Samuel Kaplan, Brian D. Cain, Timothy J. Donohue, William D. Shepherd, and Grace S.L. Yen** 15

Voltage-Dependent Orientation of Membrane Proteins, **Robert Blumenthal, Christoph Kempf, Jos Van Renswoude, John N. Weinstein, and Richard D. Klausner** 55

Volume 22, Number 2 **1983**

ARTICLES

Comparative Kinetics of Phosphomannosyl Receptor-Mediated Pinocytosis of Fibroblast Secretion Acid Hydrolases and Glycopeptides Prepared From Them, **H. David Fischer, Kim E. Creek, Pietro Strisciuglio, and William S. Sly** 69

Transport of Hemolysin by Escherichia coli, **Michael Härtlein, Sigrid Schießl, Wilma Wagner, Ursula Rdest, Jürgen Kreft, and Werner Goebel** 87

Epidermal Growth Factor Receptors on PC12 Cells: Alteration of Binding Properties by Lectins, **Ronald D. Vale and Eric M. Shooter** 99

Influence of Mitoxantrone on Nucleic Acid Synthesis on the T-47D Breast Tumor Cell Line, **Ahmad R. Safa, Nasser Chegini, and Michael T. Tseng** 111

Prolactin Receptor Expression in Monolayer Cultures of Rabbit Mammary Epithelial Cells: Pre- and Postpartum [^{125}I]-Prolactin-Binding Activity, **R.M. Soltysiak and R.E. Fellows** 121

Volume 22, Number 3 1983

ARTICLES

Sugar-Specific Endocytosis of Glycoproteins by Lewis Lung Carcinoma Cells, **A.C. Roche, M. Barzilay, P. Midoux, S. Junqua, N. Sharon, and M. Monsigny** 131

Specific Processing of the Bacterial β-Lactamase Precursor in Saccharomyces cerevisiae, **Rainer Roggenkamp, Jürgen Hoppe, and Cornelis P. Hollenberg** 141

Rotaviruses Code for Two Types of Glycoprotein Precursors, **Brad L. Ericson, Betty L. Petrie, David Y. Graham, Bruce B. Mason, and Mary K. Estes** 151

INVITED REVIEWS

Posttranslational Modification and Processing of Membrane Lipoproteins in Bacteria, **Henry C. Wu, Masao Tokunaga, Hiroko Tokunaga, Shigeru Hayashi, and Chou-Zen Giam** 161

Oxygen-Dependent Microbicidal Systems of Phagocytes and Host Defense Against Intracellular Protozoa, **Richard M. Locksley and Seymour J. Klebanoff** 173

Pyrazolopyrimidine Metabolism in Leishmania and Trypanosomes: Significant Differences Between Host and Parasite, **J. Joseph Marr** 187

Volume 22, Number 4 1983

ARTICLES

A Simian Virus 40-Encoded Protein of M_r 74,000 Daltons Is Structurally Related to the Capsid Proteins of the Virus, **Bernd Krippl, Brigitte Dreiseikelmann, and Hermann Werchau** 197

Amphiphilic Properties of the Avian Myeloblastosis Virus Major Glycoprotein, gp 80, **Dante J. Marciani** 209

A Comparison of Binding Properties and Structure of NGF Receptor on PC12 Pheochromocytoma and A875 Melanoma Cells, **Stephen E. Buxser, Leslie Watson, and Gary L. Johnson** 219

Radioiodination Studies of the Envelopes From Xenopus laevis Eggs, **Tatsuro Nishihara, George L. Gerton, and Jerry L. Hedrick** 235

Primary Photochemistry in the Facultative Green Photosynthetic Bacterium Chloroflexus aurantiacus, **Robert E. Blankenship, Reiner Feick, Barry D. Bruce, Christine Kirmaier, Dewey Holten, and R. Clinton Fuller** 251

LETTER

Nuclear Protein Changes Following N,N-dimethylformamide (DMF)-Induced Maturation, **P.M. Kimball and Sharon Hixon** 245

Author Index to Volume 22 263

Subject Index to Volume 22 265
